

Why care about China's Shadow Banking Crisis?

By Team Multi-Act

In this article:

Credit growth is a well-known factor behind bubbles and China's credit growth in the recent past should be a definite concern. Shadow banking channels (which make traditional reporting obscure) is a further negative. History shows, in many cases, how it ends in the scenario of tightening or loss of confidence among participants walking a tightrope of duration mismatch.

Read on for more insight on shadow banking risks in China.
